

ICONICA ANGEL WHITE

SUPRA-AURAL HEADPHONES

DESCRIPTION

RCF Iconica are supra-aural headphones for accurate music listening with extended low frequency response. They are ideal for use with smartphones, media players, laptops and televisions but also with high-performance Hi-Fi devices and professional audio consoles. The long-standing RCF tradition in the study of transducers has made it possible to produce a pair of headphones with a very linear frequency response and extended bass but without compromising on accuracy. This is a result of work carried out in the RCF's avant-garde R&D department. The soft leather of the ear cushions and headband lead to unmatched user comfort, even with extended use. An adapter, cables and a handy carrying case complete the standard equipment supplied with these RCF Iconica headphones.

FEATURES

- Cable with integrated Microphone and Volume control
- High Sound pressure level
- Enhanced Bass reproduction
