

TD 10

10 W UNIVERSAL LINE TRANSFORMER

DESCRIPTION

These transformers make it possible to connect loudspeakers (4 - 8 Ω impedance) to constant voltage lines (70 - 100 V). It is possible to choose the power applied to loudspeakers, as these transformers have outputs with different transformation ratios.

FEATURES

- High quality transformers suitable to connect loudspeakers with 4-8 Ω impedance (TD 105 excluded) to constant voltage lines (70-100V). It's possible to select different power values choosing different outputs
- Thanks to material over-sizing and alternate layer windings, they offer high performance: dynamics and frequency response are particularly extended. They are suitable to drive professional speakers through constant voltage power amplifiers (TD 105 excluded)
- It's possible to select different power values choosing different outputs
