

C 5212-96

TWO-WAY PASSIVE SPEAKER

Description

The C5212-96 is a full range extremely narrow dispersion two-way loudspeaker system for medium throw applications.

The high-frequency section is a constant directivity horn loaded to a 1.4" compression driver with a 2.5" diaphragm assembly for smooth, wide dispersion. The 90° x 60° horn design offers higher sensitivity for longer distance applications. The low-frequency transducer is a 12" woofer with a 3" voice coil. The crossover is easily bypassed for bi-amp via a recessed changeover switch.
