

TTL 12-S-WP

WEATHERPROOF PASSIVE LINE ARRAY SUBWOOFER MODULE

DESCRIPTION

The TTL12-S WP is an extremely compact high power line array subwoofer designed to compliment the TTL31 WP speaker system. The band pass design guarantees the maximum output per size while the 4" voice coil vented design woofer offers the minimum of power compression. The TTL12-S WP provides integrated mechanics compatible with the TTL31 WP array module. Connections to the amplifier are made through a watertight multi-pole connector. The grille is in custom perforated aluminum with open-cell fibers and water repellent woven fabric backing. The cabinet is constructed of multi-ply baltic birch plywood and finished in a very resistant, textured, polyurea black paint
