

CD1411-M

DRIVER

Description

The CD1411-M is a high performance 1.5-inch diaphragm compression driver with a 1.0 inch exit throat featuring a single piece, low compression, radial phase plug. The diaphragm and suspension are precision formed from Mylar. The CD1411-M is a very compact size, versatile driver for professional applications.

Features

- › 1.5-inch Diaphragm, 1-inch Exit Throat
- › 50W continuous program power handling
- › Frequency range: 1500Hz - 20kHz
- › Optimized geometry radial phase plug
- › Very compact size for array applications
- › Ceramic magnet assembly
- › Mylar diaphragm assembly

Part Number
