PS 4048

48 VCC POWER SUPPLY ACCORDING TO EN 54-4

Description

PS 4048 is a power supply unit suitable to get continuity power for EN54-16 systems units like DXT 9000 and DXT 7000, and relevant complementary devices in case of mains power supply interruptions.
It includes recharging and monitoring functions for the lead-acid batteries connected to it. It must be equipped with batteries with suitable capacity, dimensioned according to the system power absorption and to the evacuation requirements. According to EN54-16 standard, PS 4048 shall be installed into the same rack cabinet where there is the audio system with emergency purposes (or a system part) to which it is connected.

Features

› Permanent and emergency power for installations
› Performance and reliability for guaranteed power
› Continuity of service of your installation through real time monitoring of system status
› Control of the battery and its circuit: protection, management, self-diagnostic
› Quick and easy installation and user-friendly operation
› No preventive maintenance: continuous monitoring of the emergency power supply with local display and remote reporting

Part Number

17170158	PS 4048	220-240 V	EAN 8024530007232

Products are continually improved. All specifications are therefore subject to change without notice.
