

S 12

BASS REFLEX SUBWOOFER

Description

S 12 is a high power, compact subwoofer system ideal for those installations where the physically small size and impact of a 12" driver are desired. Extending the frequency response of these systems to below 40Hz this highly efficient design is capable of providing output levels normally associated with considerably larger enclosures. A system suited to background music playback in applications ranging from clubs, bars and cafes, right through to theatres and AV presentations. The low-frequency transducer is a 12" woofer with a 2,5" voice coil. Woofer design is the result of the latest refinements in RCF experiences in compact active and passive subwoofer design, resulting in a fast and controlled reproduction of the bass frequency range.

Features

- › 400 W RMS power handling
- › 125 dB max SPL
- › 40 ÷ 200 Hz frequency range
- › 1 x 12" high power woofer
- › High quality plywood cabinet
- › Steel front grille with clothing
- › M20 standard pole mount in top section of cabinet
- › 4 pole EUROBLOCK connector (audio input and parallel link output)
